SAFETY CAPS FOR ELUENT BOTTLES

- »» Protect your laboratory environment.
The safety system offers protection and ensures safer work in lab.
- »» Easy to use, no more twisting tubes.
- »» Protect your HPLC systems.
The integrated PTFE membrane captures dust and other contaminants from the air.

Longer lifetime with POM precision CNC fittings.
Available sizes for almost all tubing diameters.

SAFETY CAPS FOR WASTE CONTAINERS

»» High surface area (560m²/g) multi compound adsorbent. Compared to normal activated charcoal filters it also adsorbs basic and acidic compounds which brings extra protection for your lab.

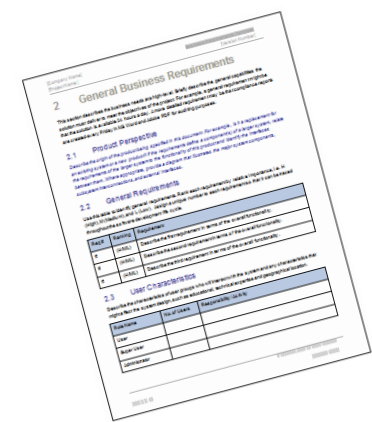

- »» With Timestrip® sticker. You do not have to note the installation date. You can easily decide when to change the filters.
- »» Available in many different cap sizes. From 40mm glass bottles up to 61 mm wide canisters.
- »» Barbed POM and PTFE waste connectors. For easy, fast and convenient connection of the silicone and PTFE waste tubings from your HPLC system.
- »» Different connectors are available. Vision Safety Caps can be connected to all HPLC systems.

SAFETY CAPS FOR WASTE CONTAINERS

SPECIAL SAFETY CAPS FOR PLASTIC CANISTERS

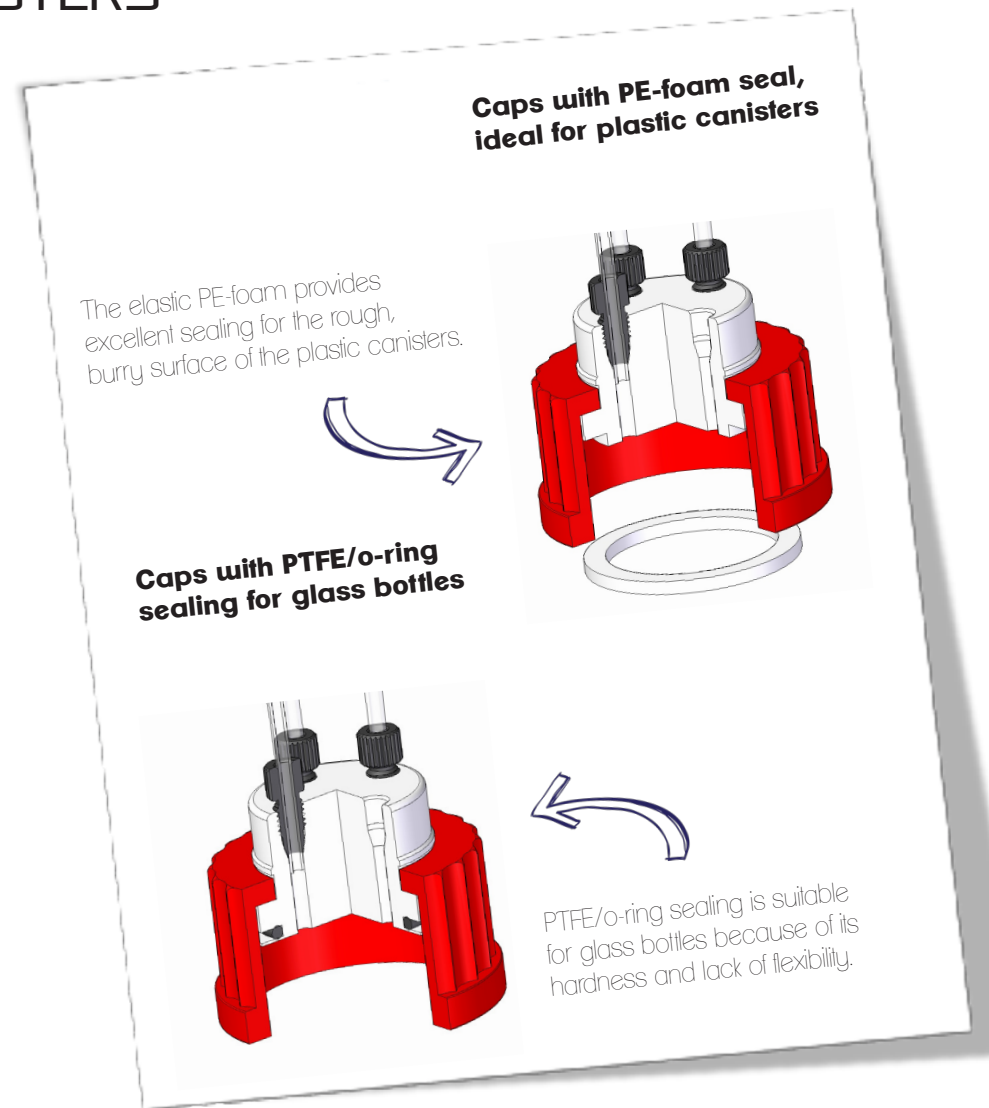

SURFACE ROUGHNESS

WIDE THREAD SIZE DISTRIBUTION

BURRY SURFACES

Did You Know?

DIN45 (plastic canisters) and GL45 (glass bottles) thread-sizes are almost identical but still there is a small difference (~0,5-1 mm) thus GL45 caps with o-ring type sealings on plastic canisters might leak. For plastic canisters please use Safety Caps equipped with elastic PE-foam sealings.
